3. Claims 1-6, 8-11, 13, 15-18 and 20-24 are allowed.
4. The following is an examiner's statement of reasons for allowance. The stabilizing device as claimed is not shown or suggested in the prior art because of the use of a device that is comprised of a stabilized payload platform, a base, and a stabilizing system that connects said platform to said base, where said stabilizing system further includes a motion sensor for sensing motion of said base and a level sensor that is fixed to said platform, and where said stabilizing system includes means to orient said platform to at least one stabilized orientation in a range between the earth's horizon and an apparent gravity horizon.
5. The prior art as disclosed by Newman (US 4,930,435) shows the use of a stabilizing device that is comprised of a stabilized payload platform, a base that is mounted to a vehicle, and a stabilizing system that connects said platform to said base, said stabilizing system further including a motion sensor for sensing motion of said vehicle, and a second set of sensors for determining relative motion between said platform and said vehicle. However, said second set of sensors is not fixed to said platform or said base, nor do said sensors function as level sensors since they are not fixed to a surface as a frame of reference.

***Conclusion***

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
